

Chapter 29 Vocab

Make vocab cards for the following 40 words:

- Xylem (Review from Ch 26 and 28)
- Phloem (Review from Ch 26 and 28)
- Phyllotaxy
- Canopy
- Apoplast
- Symplast
- Osmosis (Review from Ch 5)
- Water potential
- Solute potential
- Pressure potential
- Protoplast
- Turgor pressure
- Flaccid (Review from Ch 5)
- Plasmolysis (Review from Ch 5)
- Turgid (Review from Ch 5)
- Wilting
- Aquaporins (Review from Ch 5)
- Bulk flow
- Essential element
- Hydroponic culture
- Macronutrients
- Micronutrients
- Humus
- Loam
- Nitrogen fixation
- Nodule
- Mycorrhizae (Review from Ch 26)
- Epiphyte
- Endodermis (Review from Ch 28)
- Casparian strip
- Xylem sap
- Transpiration
- Circadian rhythm
- Absciscic acid (ABA)
- Xerophyte
- Crassulacean acid metabolism (CAM) (Review plant type from Ch 8)
- Translocation (Definition #3)
- Phloem sap
- Sugar source
- Sugar sink
